

# Megadoors for Airbus A380

Qatar Airways

GAMECO

## Megadoor hangar doors for Airbus A380.

The new huge aircraft Airbus A380 requires new hangars to be built. Megadoor has supplied hangar doors for two new hangars designed particularly for A380.

The hangar for Qatar Airways at Doha Airport has a Megadoor multiple door with 7 door leaves. The fabric colour is translucent white for improved light transmission into the hangar. The Megadoor has a width of 145 m.

The new GAMECO maintenance hangar at Guangzhou Baiyun International Airport in China has three Megadoor multiple doors. Two of the Megadoors are divided into 5 door leaves and one into 7 door leaves. The widths of the three Megadoors are 96, 144 and 95 m.

The Megadoor solution with swing-up mullions between each door leaf, gives an optimal opening flexibility.

For further information please contact the Megadoor representative in your country.
