

BG QUICK®

Accelerator

INSTRUCTIONS FOR USE

MIXING AND APPLICATION

- Accelerator (gingery powder) is added to the mixture before adding the liquid.
- Maximum admissible quantity is 4% of weight of the whole delivery (including the liquid), i.e. 40 kg/ton.

PLACEABILITY AND SETTING SPEED

- It is not always necessary to use the maximum quantity of the accelerator. Always try a small sample to find out what quantity is the best for the given circumstances.
- The more accelerator you use, the more acceleration you get.
- However, if you exceed the maximum admissible quantity of 4%, you will not even be able to empty the bucket with mixed BG QUICK.

PACKAGING

- The accelerator is supplied in 5kg, 10 kg, 20 kg, and 30 kg buckets with a red stripe.

STORAGE

- Accelerator stored in original closed packaging has unlimited storage life.
- Accelerator stored in opened packaging should be used within 6 months after opening.
- Store in a dry place. Frost does not affect the quality of the accelerator.
- It is not recommended to store the accelerator in direct sunlight or in rooms with temperatures higher than 30°C.
